Introduction

Welcome to the 33rd Brigade's Official website. This clan was formed to become one of the most relaxed and easy going gaming communities anyone has ever seen. Our clan's main goal is to just have good time. As for the bigger picture we are the type of people that are here to game and relieve ourselves from the everyday stresses of life. We believe in creating a clan based on good principles we can achieve an enlighten state of gaming. We have had a long history in running clans and we feel that it is time for a change. This clan is destined to bring together some of the best gamers that the PlayStation network has ever seen. We plan to achieve this, by recruiting only the most cool-headed easy going gamers to kick ass and ask questions later. We are not a clan that will boot you out for lack of performance or for spending time with family since a lot of us have kids). This is a clan for the kind of gamer that just wants to escape into a virtual world with out having to deal with the politics of your everyday clan

We chose the name 33rd Brigade because of the mysterious properties and symbolism surrounding the number 33. It is considered a divine number, which can represent God and Man. There are 33 energies of man and 33 mitotic divisions, which describe all the fields of force surrounding the spirit. 33 also signifies the Alpha and Omega, which is a person that has supreme talent, true power, leadership and holy unions. Did you know that the Free Masons and other occultists revere 33 above all other numbers? In fact numerous wars have taken place on or near the 33rd Degree Parallel including the war in Iraq. Baghdad is located at the 33 Degree 33 N. Latitude. But it doesn't stop there the United States Army consists of 33 brigades. Jesus died at the age of..... you guessed it 33. Roswell New Mexico is located at the 33 Degree 37 N Latitude pretty weird huh? I could go on forever. Many people claim to see the number 33 showing up it strange places. For instance the symbol for Microsoft has the number 13 and 33 hidden inside the design. Now don't be surprised after reading this if you start seeing the number Thirty-three everywhere
